A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, depend upon or refer to future events or conditions, or include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates", "preliminary", "typical" and other similar expressions. In addition, these statements may relate to future corporate actions, future financial performance of a fund or a security and their future investment strategies and prospects. Forward-looking statements are inherently subject to, among other things, risks, uncertainties and assumptions that could cause actual events, results, performance or prospects to differ materially from those expressed in, or implied by, these forward-looking statements. These risks, uncertainties and assumptions include, without limitation, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, the volatility of global equity and capital markets, business competition, technological change, changes in government regulations, changes in securities laws and regulations, changes in tax laws, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or pandemics (such as COVID-19), and the ability of manager to attract or retain key employees. The foregoing list of important risks, uncertainties and assumptions is not exhaustive. Please consider these and other factors carefully and do not place undue reliance on forward-looking statements.

The forward-looking information contained in this report is current only as of the date of this report. There should not be an expectation that such information will in all circumstances be updated, supplemented or revised whether as a result of new information, changing circumstances, future events or otherwise.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2024

Management Discussion of Fund Performance

June 6, 2024

This Management Discussion of Fund Performance presents the portfolio management team's view on the significant factors and developments that have affected the Fund's performance and outlook in the year ended March 31, 2024 (the "period"). If the Fund was established during the period, "period" represents the period since inception.

In this report, "IGIM" and "the Manager" refer to I.G. Investment Management, Ltd., the manager of the Fund. In addition, net asset value ("NAV") refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based.

Please read *A Note on Forward-Looking Statements* on the first page of this document.

Investment Objective and Strategies

The Fund aims to provide interest income by investing primarily in bonds and debentures of non-Canadian issuers.

Risk

The risks of the Fund remain as discussed in the Fund's initial Simplified Prospectus.

The Fund is suitable for long-term investors looking for income who have a low tolerance for risk.

The Fund is currently available for investment only by other IG Wealth Management Funds.

Results of Operations

Investment Performance

The performance in the current and previous periods is shown in the *Past Performance* section of the report. The following comparison to market indices is intended to help investors understand the Fund's performance relative to the general performance of the markets. However, the Fund's mandate may be different from that of the indices shown.

For the year ended March 31, 2024, the Series P securities returned 4.3% (after deducting fees and expenses paid by the Fund). In comparison, the ICE BofA Global Broad Market (Hedged) Index returned 2.5%.

The U.S. Federal Reserve, the European Central Bank and the Bank of England raised interest rates early in the period in response to elevated inflation. After July 2023, the Federal Reserve kept the federal funds rate at a target range of 5.25%–5.50%. Treasury yields reached peak levels and then fell in response to the policy shift. The Bank of Japan raised its policy rate for the first time in 17 years, but many central banks signalled potential rate cuts for 2024.

The Fund outperformed the index, with duration positioning in the United States, the eurozone and Japan contributing to performance. Exposure to securitized fixed income assets, mainly collateralized debt obligations and collateralized loan obligations, as well as to non-agency mortgage-backed securities, also contributed to performance. Duration positioning in emerging market local debt detracted from performance.

Net Assets

The Fund's net assets increased by 25.5% during the period to \$1.3 billion. This change was composed primarily of \$51.7 million in net income (including any interest and/or dividend income) from investment performance, after deducting fees and expenses, and an increase of \$207.2 million due to net securityholder activity (including sales, redemptions and cash distributions).

Fees and Expenses

The management expense ratio ("MER") for each series during the year ended March 31, 2024, was generally similar to the MER for the year ended March 31, 2023. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. No management fee or administration fee, other than certain specific fund costs, is charged to the Fund. The MERs are presented in the *Financial Highlights* section of this report.

Recent Developments

The portfolio management team believes higher savings balances and a slower pass-through of monetary policy in the United States relative to other developed markets could keep inflation above the Federal Reserve's 2% target over the near term. It expects the Federal Reserve to begin reducing rates around mid-2024, along with other central banks. However, the Federal Reserve's subsequent rate-cutting path could be more gradual than previously anticipated.

Although the team believes an economic "soft landing" is achievable, both recession and inflation risks remain elevated in the aftermath of unprecedented global shocks to supply and demand. Because the Canadian economy appears to be less resilient than the U.S. economy, the Bank of Canada may need to be more forceful with rate cuts than its U.S. counterpart.

Related Party Transactions

I.G. Investment Management, Ltd. is the Manager, Trustee and Portfolio Advisor of the Fund. The Fund is only available for purchase by other IG Wealth Management Funds and is not available for purchase by retail investors. The Manager, Portfolio Advisor and Trustee are, indirectly, wholly owned subsidiaries of IGM Financial Inc.

Certain other investment funds, distributed by IG Wealth Management, and other qualified investors may invest in Series P of this Fund. As at March 31, 2024, this series comprised 100.0% of the Fund's net assets. The Manager relied on standing instructions approved by the IG Wealth Management Funds Independent Review Committee for the execution of all such transactions, which are based on the net asset value per security determined in accordance with the stated policies of the Fund on each transaction day. Investments by other investment funds in the Fund increase the risk of large redemption or purchase orders, which could result in larger than normal cash positions in the Fund for short periods of time. This could have an impact on the Fund's operations. However, the Manager uses various strategies to minimize the potential dilutive impact associated with large cash positions. These strategies may include transferring securities in-kind where possible, utilizing ETFs to maintain market exposure in lieu of cash and spreading transactions in smaller increments over a period of time.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE | For the Year Ended March 31, 2024

Past Performance

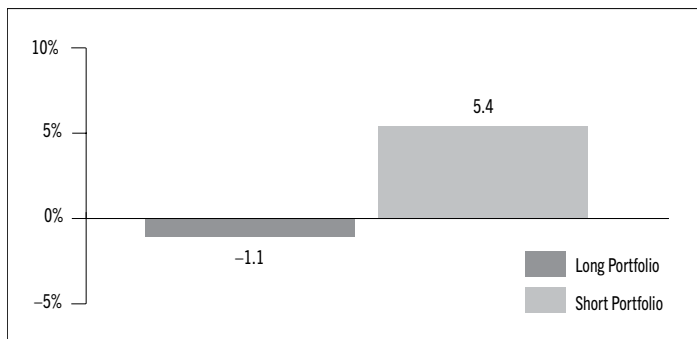

The Fund's performance information assumes all distributions made by the Fund in the periods presented are reinvested in additional securities of the relevant series of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges, or income taxes payable by any investor that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

Year-by-Year Returns

The following bar chart presents the performance of Series P of the Fund for each of the fiscal periods shown. The chart shows, in percentage terms, how much an investment made on the first day of each fiscal period, or on the series inception or reinstatement date, as applicable, would have increased or decreased by the last day of the fiscal period presented. Series inception or reinstatement dates can be found under *Fund Formation and Series Information*.

The following bar chart presents the performance of the Fund's long and short portfolio positions for the period ended March 31, 2024, before deducting fees and expenses and before the effect of other assets (liabilities).

Annual Compound Returns

The following table compares the historical annual compound total returns for each series of the Fund with the relevant index or indices shown below for each of the periods ended March 31, 2024. Investors cannot invest in an index without incurring fees, expenses and commissions, which are not reflected in these performance figures.

All index returns are calculated in Canadian dollars on a total return basis, meaning that all dividend payments, interest income accruals and interest payments are reinvested.

Percentage Return:	1 Yr	3 Yr	5 Yr	10 Yr	Since Inception
Series P	4.3	-1.7	0.9	n/a	1.6
ICE BofA Global Broad Market (Hedged) Index	2.5	-2.4	-0.0	n/a	0.7

The ICE BofA Global Broad Market (Hedged) Index tracks the performance of investment grade debt publicly issued in major domestic and eurobond markets, including sovereign, quasi-government, corporate, securitized and collateralized securities. Qualifying bonds must be rated "BBB" or higher and have a remaining term to maturity of at least one year. The foreign currency exposure is hedged to the Canadian dollar.

(1) These calculations are prescribed by securities regulations and are not intended to be a reconciliation between opening and closing net assets per security. This information is derived from the Fund's audited annual financial statements. The net assets per security presented in the financial statements may differ from the net asset value per security calculated for fund pricing purposes. An explanation of these differences, if any, can be found in the *Notes to Financial Statements*.

(2) Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of securities outstanding over the fiscal period.

(3) Distributions were paid in cash, reinvested in additional securities of the Fund, or both.

Net asset value per security (\$)	9.56	9.19	9.76	10.37	10.30

(1) This information is provided as at the end of the fiscal period shown.

(2) Management expense ratio ("MER") is based on total expenses, excluding commissions and other portfolio transaction costs, income taxes and withholding taxes, for the stated period and is expressed as an annualized percentage of daily average net assets during the period, except as noted. In the period a series is established, the MER is annualized from the date of inception to the end of the period. Where the Fund directly invests in securities of another fund (including exchange-traded funds or "ETFs"), the MERs presented for the Fund include the portion of MERs of the other fund(s) attributable to this investment. Any income distributions received from ETFs managed by affiliates of the Manager, with the intention of offsetting fees paid within those ETFs but which are not considered to be duplicative fees under regulatory requirements, are treated as waived expenses for MER purposes. The Manager may waive or absorb operating expenses at its discretion and stop waiving or absorbing such expenses at any time without notice.

(3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of daily average net assets during the period. Where the Fund invests in securities of another fund (including ETFs), the TERs presented for the Fund include the portion of TERs of the other fund(s) attributable to this investment.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund. The portfolio turnover rate is not provided when the Fund is less than one year old. The value of any trades to realign the Fund's portfolio after a fund merger, if any, is excluded from the portfolio turnover rate.

Management Fees

The Fund is only available for purchase by other IG Wealth Management Funds and is not available for purchase by retail investors. In order to avoid duplication of fees in the other IG Wealth Management Funds, the Fund does not pay a management fee.
